

SEAMLESS BOTTOM BAFFLES (SBB)

G&S Acoustics' Seamless Bottom Baffles give a solid, continuous look to the bottom of our fabric covered acoustical baffles. The seams are rotated to the vertical edges and to the top of the baffles. This allows the face and the bottom of the baffles to have a seamless appearance. These baffles should only be used when the vertical edges and top of the baffle are hidden.

Since the fabric "wraps" the baffle, it's best to use omnidirectional fabric. Sizes can be restricted by the width of the fabric.

CORE SECTIONS

CORE
6-7 pcf fiberglass
Thickness: 2"

SIZES
Maximum size 8'x2'

MOUNTING
Threaded Inserts

FINISH
Fabric

EDGES
Square

FLAMMABILITY
All components have a Class "A" rating per ASTM E84

SOUND ABSORPTION

Hz	125	250	500	1000	2000	4000	NRC
SBB2	1.13	2.13	6.31	8.65	8.59	7.83	1.60

Note: NRC test results based on our standard acoustically transparent fabric. Results may vary with other fabrics.
