MOSAIC PANELS

Mosaic Panels bring a modern twist to standard acoustical panels. This distinctive panel is created by custom cutting straight or curved lines directly into the face of an acoustical panel to create words or patterns. Wall or ceiling mounted, each panel can be covered with multiple fabrics for a unique and dramatic finish.

AI

ACOUSTI-IMAGE PANEL

Acousti-Image Panels use state-of-the-art custom fabric printing processes to make acoustical products stand out as communication platforms. Acoustical panels are perfect locations to advertise or express a client's vision. Use Acousti-Image Panels on single, individual panels or large mural images by combining panels.

CS

CUSTOM SHAPED PANELS

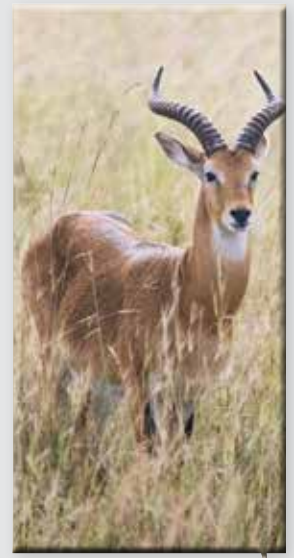

Custom Shaped Panels combine sound absorption with unlimited design potential. Using your design creation, G&S Acoustics can transform a standard acoustical panel into a work of art by custom cutting individual panels or full wall applications. Our innovative technology allows for small curves and tight radiuses.

QI

QUIK-IMAGE PANEL

Quik-Image Panels allow for maximum design flexibility. Using your custom printed images, G&S Acoustics can create interchangeable graphics to tightly fit over an acoustical fiberglass core. These graphics are easily removed or replaced on the spot, no tools or equipment required.
