### **aCapella AND YOU**

Design teams working with the aCapella line can enjoy creative freedom to choose the system that functions best for their project and enhance their overall design. With aCapella, you've chosen a high-quality, recycled polyester board that provides design, color and acoustical solutions. aCapella offers six customizable sound control products, as well as the option to create totally original and unique acoustical systems. Sixteen bright color options bring energy and life to interior spaces.

## aCapella AND OUR ENVIRONMENT

Environmental responsibility has never been more important. aCapella is a prime example of upcycling. We use materials from recycled #PET bottles to create superior acoustic materials.

By specifying aCapella acoustic products, you've made an eco-friendly choice. We've checked all the boxes with this product.

- ½" (12mm) Acoustical Polyester Board
- Uses 60% post-consumer waste from Recycled #PET bottles
- Custom sizes and shapes up to 9' x 4'
- Sound Absorptive .45 to 1.00 NRC
- Bleach Cleanable (10:1)
- 16 Standard Colors
- Custom Printing Available
- Customizable
- Durable
- Class A Fire Rated per ASTM E84
- Weight: ½ lb per sq. ft.
- Density: 12 pcf

**ACOUSTIC DESIGN IS MUSIC TO OUR EARS.**

## aCapella VERSE

aCapella Verse Baffles are designed for isolating noise and absorbing sound in open ceiling environments such as office spaces, restaurants, lobbies and classrooms. The baffles are spaced at least 3" apart and hung **individually** from existing ceiling grid systems, roof decks or bar joists in open ceiling areas. Verse Baffles come in three designs: Range, Wave and Flat baffle shapes. Custom baffle shapes are also available. Verse Baffles add color with the use of 16 bold and bright color options.

## aCapella CHORUS

aCapella Chorus Baffles are a ceiling baffle system **suspended in a group of panels** that provides noise reduction and design elements for open ceilings. Chorus Baffles are **grouped** from an aluminum tubing structure for easy hanging. Chorus Baffles are supplied in 16 colors and feature three designs, Range, Wave and Flat baffle shapes. Custom baffle shapes are also available. Perfect for use in offices, restaurants or event spaces, Chorus Baffles add design to any ceiling.

## aCapella VERTICALS

aCapella Verticals are **sound-absorbing ceiling baffles** suspended in single units or linked together to create **hanging mobile sculptures**. The intent of Verticals is to use the inner, solid panel and the outer, open panel to create vertically hanging decorative and acoustical systems. With Verticals, there is no waste as each component is cut from the other. Verticals are available in standard shapes as well as a wide variety of custom shapes. Mix and match any of the available 16 colors to create a unique design. Hang up to six Vertical units in one group.

## aCapella FLOATS

aCapella Floats are flat, custom shaped, **sound-absorbing ceiling clouds**. Each Float can hang from the ceiling at any angle, depending on the desired design and acoustical effect. Floats are supplied in 16 colors and come in square, circular, triangular, rectangular, polygon and trapezoid shapes. Custom shapes are available. All shapes are available in solid or open panels. See aCapella Verticals for more details.

### aCapella SCORES

aCapella Scores are **sound-absorbing wall panels**, which feature full wall applications, shape clusters, decorative cut-outs, and individual shapes. Durable and colorful enough for office spaces, Scores create an acoustically comfortable environment, and are available in standard shapes as well as a wide variety of custom shapes. Scores wall panels are offered in 16 standard colors.

### aCapella aTILES

aCapella aTiles are **flat, sound-absorbing and colorful ceiling tiles**. aTiles can be installed in a variety of ways, including lay-in grids and direct applied with mechanical fasteners or adhesive. aTiles provide sound control while adding color to the design of any space. Custom shapes and sizes are available. Choose from 16 standard colors.

## aCapella TEMPOFINS

aCapella TempoFins are **wall mounted polyester acoustical panels**, but with a twist, these fins are installed **perpendicular to the wall**. The fins are securely installed with mechanical fasteners, so they can extend up to 24" away from the wall and up to 108" high. When cut into custom shapes and designs, TempoFins add multiple dimensions to any flat wall. Choose from 16 standard colors.

## aCapella STRUCTURES

aCapella Structures are designed for **isolating noise and absorbing sound in open ceiling** environments while providing design elements. The clouds are **hung in a group** from existing ceiling grid systems, roof decks or bar joists in open ceiling areas. aCapella Structures come in six designs. Custom structure configurations are also available.

### aCapella PartiTions

aCapella PartiTions are **suspended, polyester acoustical panels** with **cut-out designs**. PartiTions are used to divide open spaces, or work areas, with partial obstructions and creative design. In addition, PartiTions provides some sound absorption. Hung from two hanging points, PartiTion panels can be cut to any design up to 4' x 9' in 16 solid colors and are available in 12 standard designs.
