

CLEAN IMPACT **TEXTILES**™

Duvaltex CLEAN IMPACT TEXTILES™ are designed
with sustainability in mind.

Our unique approach — focused on reusing discarded materials and reducing waste — is inspiring our industry to preserve our planet for future generations.

INDUSTRY-FIRST **100% POST-CONSUMER RECYCLED BIODEGRADABLE POLYESTER**

BIODEGRADABLE CLEAN IMPACT TEXTILES™ address the daunting problem of how to deal with polyester fabric at the end of its useful life.

By redesigning throwaway materials into biodegradable textiles*, we can solve the problem at its roots and help keep plastic out of our oceans and landfills.

We achieve this through the addition of a bio-catalyst in the yarn-extrusion process which enables anaerobic digestion in landfill.*

Biodegradable* in landfill after 1,278 days

Designed and manufactured for recyclability or biodegradability

Industry-leading performance without compromising sustainability

*Rate and extent of biodegradation into elements found in nature is 91% after 1,278 days under ASTM D5511 (Anaerobic Biodegradation of Plastic Materials Under High Solids Anaerobic Digestion Conditions). The test was done with the same component (PET) polyester and biocatalyst additive. No evidence of further degradation.

SEAQUAL™ 100% POST-CONSUMER RECYCLED POLYESTER WITH OCEAN WASTE

OCEAN WASTE CLEAN IMPACT TEXTILES™ tackle one of the most pressing environmental issues we face today: pollution of oceans by plastics.

By partnering with the SEAQUAL™ initiative, we can transform ocean waste into amazing textiles.

This innovative sourcing approach makes us part of a collective effort to clean our oceans and reduce plastic pollution worldwide.

For every pound of fabric, half a pound of marine waste is removed from the ocean

Compliance with the highest industry standards

Full traceability throughout the supply chain
