

SOUNDWAVE CLOUDS (SWC)

SoundWaves are G&S Acoustics' **curved**, independently-hung, **sound-absorbing** acoustical clouds. SoundWaves are available in High Tide and Low Tide shapes; and they arrive pre-curved to our standard 132" radius, ready to install.

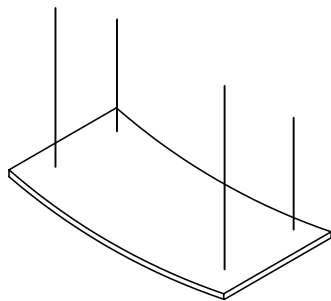

Due to alignment, we recommend a minimum 12" reveal between clouds when SoundWave Clouds are installed in groups.

An optional foil or finished backing is available.

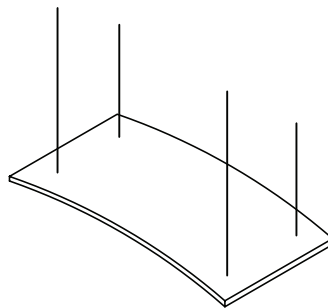

SoundWaves are available with two finishes:

SoundWave Pinta Clouds - a painted finish

SoundWave Fabric Cloud - a fabric finish

Low Tide
(Convex)

High Tide
(Concave)
