

SILENT NIGHT (SN)

Silent Night (SN) panels are G&S Acoustics' lightweight, sound absorbing, all black panels*. SN is comprised of a single 6-7 pcf fiberglass core with a black matte facing and can be installed in a variety of ceiling or wall conditions, including lay-in grids, mechanically clipped or painted pucks.

Typical applications for Silent Night panels include theaters, restaurants, music studios, retail stores and home theaters that require an affordable black ceiling with acoustical properties.

Custom sizes, designs and wall applications are available, please contact us for more information.

CORE

6-7 pcf black recycled fiberglass*, 1" and 2" thick
