

aCapella aTile-Images are custom **printed flat, sound-absorbing and colorful ceiling tiles**. aTile-Images can be installed in a variety of ways, including lay-in grids and direct applied with mechanical fasteners. aTile-Images provide sound control while adding color to the design of any space. Custom shapes and sizes are available. We recommend using aCapella Cotton, our white panel because the images are most vibrant. Any of the other 15 aCapella colors can be printed.

## Resolution Example

## Sizing and DPI:

Images should be sent to scale\* and no less than 150 dpi (dots per inch). Anything smaller will not give you a clear resolution (see resolution example).

## Format:

**Software:** Most current version of Adobe Illustrator, Adobe Photoshop and Adobe InDesign are preferred. If you are using software other than these listed, the files need to be in PDF using PDF/X-1:2001 standard settings. Other usable files are: Tiff, Jpeg, PSD or PDF.

**Fonts:** When submitting files, convert all fonts to outlines or curves. If your file has not been converted, please include original font files.

**PMS Color Matches:** The most commonly-used color reference for digital printing is the PMS System (Pantone Matching System). When building files, please declare all required PMS colors to be matched. Depending on the printing device and material specified, up to 80% of PMS colors can be matched accurately.

**Panel Sizes:** Individual panels up to 4' x 9'. Full wall murals also available.\*\*

\*Full scale image (at actual size, i.e., 2'x2' = 24"x24") to be provided to G&S Acoustics.

\*\*G&S Acoustics will make appropriate breaks in image to fit panel size (see example at right).
