

CEILING MOUNTING: Accent Baffles with Threaded Insert and Swivel Cable Lock

APPLICATION:

Mounting Accent Baffles to a ceiling using a threaded insert, Swivel Cable Lock and cable.

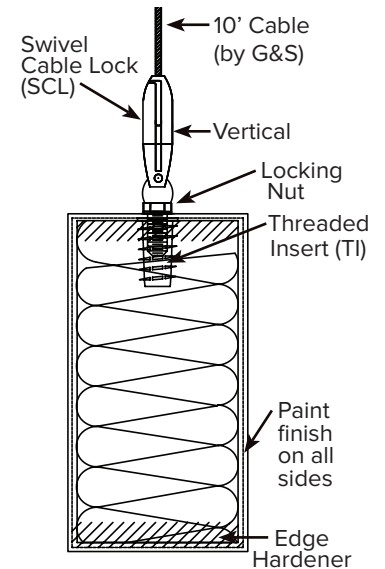

DESCRIPTION:

This installation technique uses a threaded insert (TI) set in place by G&S on the top of Accent Baffle. A Swivel Cable Lock (SCL) is screwed into the threads (by others). DO NOT OVER TIGHTEN. Installation is as follows:

1. Handle the Accent Baffle very carefully. If the Baffles are wrapped in packaging, leave them wrapped until they are installed.
2. Accent Baffles should be installed with a minimum of 2" between the baffles
3. Screw the SCL into the TI.
4. Confirm the swivel is in the vertical position when tightened.
5. Insert blank cable into SCL. Confirm that it is locked.
6. Attach cable to ceiling structure above using appropriate fasteners (by others).

Mounting Detail

Swivel Cable Lock

Optional

- Cable
 - Longer lengths available by request
- Threaded Swivel
 - TI takes a 1/4" 20 thread

Provided by G&S
