

ARTOFIX

# OUR STORY

## Creative collaboration

We use art to solve acoustic problems and beautify living spaces. Our solutions combine acoustic comfort with careful design to create healthy, inspiring environments that make everybody feel better. Our ultimate goal is to help our customers transform their living environments into better spaces.

Artofix delivers acoustic solutions that combine acoustic expertise with extensive experience in innovative product design.

We draw inspiration from our hometown of Montreal, a UNESCO City of Design. Our products fuse the city's European influences with

its unique architecture. Our Crystal tile (platinum award winner at the Grands Prix du Design) echoes the outline of the city's iconic Mount Royal.

At Artofix, we're always thinking about well-being and the environment. All our products are designed and manufactured in Canada with raw materials sourced from local supply chains. We use recovered materials wherever possible. And not only are Artofix products sustainable, they can also be disassembled and reused.
