

aCapella TempoFins are **wall mounted polyester acoustical panels**, but with a twist, these fins are installed **perpendicular to the wall**. The fins are securely installed with mechanical fasteners, allowing TempoFins to extend up to 24" away from the wall and up to 108" high. When cut into custom shapes and designs, TempoFins adds multiple dimensions to any flat wall. In addition, the 1/2" thick panels are available in any aCapella or Woodwinds collection color, providing a wide range of color combinations and design opportunities.

**STANDARD SHAPES**  
(custom shapes are available)

**SOUND ABSORPTION - IN SABINS**
